LEWYT SPAY NEUTER PROGRAM FOR DOGS AND CATS

Dear Applicant,

Thank you for applying for assistance from the Lewyt Spay Neuter Fund for Dogs and Cats. We are happy to see that you know the importance of sterilizing your pet. The NHHS, a private, non-profit organization, is trying to help curb cat overpopulation by making sterilization surgery more affordable and available. We help those individuals whose animal has perhaps had a few litters or is not yet s/n and cannot afford or do not qualify for any other program available (i.e. Plan A or B)

We require the following information:

- Application completed **in full**. Missing information will delay the approval process.
- List all the vaccinations your pet has had; **provide a copy of the vaccination certificate** or receipt from the veterinarian.
- Your pet must be current on rabies and distemper vaccinations. If your pet is not vaccinated, we will provide the vaccines here at no charge.

If you are unable to provide any of the required information, please include a note as to why. While we try to accommodate as many applications as possible, we have limited resources and must restrict participation to a certain degree.

When your application is complete, please return it to the NH Humane Society. We review applications as soon as possible after receipt. Once you have been approved, we will be contact you to give you an appointment and pre-surgery instructions for an upcoming clinic.

You **must** bring current vaccination records with you on the day of the surgery. If your pet is found to have fleas, ear mites or parasites we will treat them while they are here.
